

SECURITY FLASH

The wave lift from the Pic de Sure is located in the "Alpes" LTA, in the vicinity of a very busy commercial route for airlines arriving at Lyon St Exupéry. These jets can be flying as low as FL195.

As a matter of security, we ask you to

STOP CLIMB AT 5800 m MAXIMUM

This limitation is intended as a **security margin** to avoid unwanted infringements above FL195.

If you need to achieve your 5000m goal, you can either use :

- below FL195 : R120 A,B,C or other parts of Alpes LTA
- above FL195 : R180 (Lure) ou R173 (Fayence). Ask about the procedure.

Always check the altitude value in meters of FL195 before Take-Off.

Always use your altimeter when necessary.
